

## **"INTRAORAL PHOTOGRAPHY: EQUIPMENT & TECHNIQUE -- A HANDS-ON WORKSHOP"**

**Location: PDA EDUCATIONAL CENTER  
1408 HORIZON AVENUE  
LAFAYETTE COLORADO 80026  
888-494-2118 [www.pdacolorado.com](http://www.pdacolorado.com)**

*Presented by: Dave Hutt, DMD Digital Dental Photography, Portland Oregon*

### **Course Description:**

**Choosing the right professional equipment.** This overview of digital SLR cameras is designed to help the dentist be an informed consumer when purchasing new equipment, or upgrading to professional systems. Cost comparisons, SLR vs point-and-shoot, ringflashes, macro lenses and more, are fully discussed.

**Making the camera, macro lens, and ringflash work as a system.** An in-depth discussion of the settings that make these systems work at maximum quality. The dentists will learn shooting operations that have been perfected by professional photographers to make intraoral and extraoral photography simple, reliable, and consistent.

**Ringflashes vs Twinlights.** This will cover the different photographic applications needed for successful shade-matching photography.

**Basic file management issues.** An overview of RAW, jpeg, and tiff files; advantages and disadvantages of their use; when and how their use is most appropriate. We'll look at some of the popular graphics programs like Photoshop and Adobe Lightroom.

**Hands-on and Q & A.** We'll show some of the latest systems from Canon and Nikon. Participants are encouraged to bring their own cameras to learn more about.

**Date: Friday, September 26, 2008    8:00 am to 12:00 noon    Registration 7:30 am**

**Course Fee: \$199 Dentist / \$139 Team Members & Students  
Continental Breakfast Included**

Dave Hutt is a professional photographer with more than 30 years of commercial and studio experience. For over ten years he has introduced medical, dental, and law enforcement professionals to the use of digital photography. As a founding partner, and Training & Workshop Coordinator, for DMD Digital Dental Photography ([www.dmddigitalphoto.com](http://www.dmddigitalphoto.com)), he concentrates now mainly on working with dentists. His courses cover the many issues involved in camera & flash use, shade-matching, portrait lighting, file management and printing. He has given talks with the Tanaka Study Group, Oregon Health Sciences University, Astra Tech World Congress, and with study groups and dental associations throughout the U.S. He is a 1975 graduate of the University of Wyoming.
